Hydronic Heat Transfer Fluids

Inhibited Propylene Glycols

SAFE-T-THERM® GRAS

Contains USP grade propylene glycol. Product is approved by the FDA, Generally Recognized As Safe (GRAS) for secondary heating/cooling systems especially in the food processing and beverage industry.

SAFE-T-THERM® Classic

Contains industrial grade propylene glycol. Product does not contain the GRAS FDA approval. Good for use in secondary heating/cooling systems.

SAFE-T-THERM® HD

Contains industrial grade propylene glycol and a fortified inhibitor package compared to “classic” which enhances the corrosion protection for secondary heating/cooling system.

SAFE-T-THERM® Biobased (available as GRAS, Classic or HD)

Contains propylene glycol derived from renewable resources for environmentally conscious applications.

SAFE-T-THERM® “AL”

Contains industrial grade propylene glycol and a proprietary inhibitor package for aluminum system protection.

Inhibited Ethylene Glycols

WINTREX®

Industrial fluid applicable where contact with food or potables is not possible.

WINTREX® “HD”

Enhanced inhibitor package for greater thermal stability.

WINTREX® “N”

Proprietary inhibitor package protects cylinder linings from cavitation.

Inhibited Ethyl Alcohol

GeoSafe®

Renewable geothermal fluid with a unique inhibitor and denaturant package

- *5 gallon pails, 55 gallon drums, 250 gallon totes & tank trucks*
- *Available in concentrate and various dilutions*
- *Free yearly written glycol analysis with laboratory recommendations*
- *Delivered when you need it*
- *We also have a Full Line of Water Treatment Products available*
