

The Mystery of Glycol Colors

Traditionally, glycol color represented manufacturer, glycol grade, and other marking factors. As companies enter the industry there are no longer consistent marking factors. As a manufacturer, Houghton Chemical blends many products with various colors.

SAFE-T-THERM® GRAS

SAFE-T-THERM® Biobased

SAFE-T-THERM® HD

WINTREX®

SAFE-T-THERM® AL

GeoSafe®

Want a Specific Glycol Color?

We can add any color to our top quality formulations. Whether you want purple, red, pink or clear, Houghton will make it for you. Just ask us!

Red

Clear

Pint

One Gallon

2 Ounces

5 Gallon

Do you Suspect a Leak but your Glycol is Clear?

Dyed glycol provides leak detection. This is imperative in food and beverage facilities. However, the market offers various undyed (clear) glycol brands. If you suspect a leak and have clear glycol, consider adding dye. Remember, when you purchase glycol, color counts.
